Timur Khuzin

Product Designer with 11+ years in engineering and a focus on clear, thoughtful digital experiences

Key skills

- Prototyping
- UI Design
- Web Design
- UX Research
- HTML / CSS
- App Design

Work experience

2025 · Team project

UX/UI Designer — GitVerse (SberTech)

Redesigned a developer blog and relaunched the AI assistant. Shaped the information architecture, defined JTBD for different segments, and contributed to the design system.

Cut time-to-find-information by 30%. The AI assistant became a key product feature.

2025 · Internship

UX/UI Designer Intern — Ozon

Designed a new functional block for the mobile app. Ran UX testing with an international audience and iterated on the prototype.

Usability Score rose from 3.5 to 4.7 out of 5. Prepared 20+ screens for handoff.

2024 · Hackathon

UX/UI Designer — OKKTA MegaHackathon

Hackathon for Oneum, a ChatGPT-based chatbot service. Led the UX/UI track for a team of 6 designers, designed key screens and a component library.

Team placed 2nd.

2024 · Academic project

UX/UI Designer — Prokennex

Website redesign for a tennis racket manufacturer. Mapped 5 user scenarios, reworked the IA, and built responsive layouts across 4 breakpoints.

Delivered a modern interface with clear visual hierarchy and an animated homepage.

2024 · Academic project

UX/UI Designer — ElevateU

Mobile learning app. End-to-end: research → prototype → usability test.

Tested with 5 respondents, built a design system and 24 wireframes.

2014 – 2026

Process Engineer — Rosneft, NNK

Progressed from field operator to chief specialist. Analyzed production data, developed technical improvements, and coordinated engineering teams.

Implemented projects in intelligent control systems, diagnostics, and energy efficiency. Recognized with awards at PJSC Udmurtneft and placed in the "Best in Profession" competition.
